

“Chronic Constipation: Current Perspectives and Clinical Management”

Richmond Hotel, Copenhagen - Denmark
March 11th 2011 10 a.m. to 6 p.m.

Dear colleague

The chronic constipated patient is abundant in the clinic. Considerations regarding referral, choice of diagnostic testing and treatment are important and often problematic. The scientific meeting “Chronic Constipation: Current Perspectives and Clinical Management” in Copenhagen March 11th 2011 will provide expert opinion on the following:

- Which patient needs advanced diagnostic testing?
- Which diagnostic tests are available?
- State of the art medical and surgical treatment of constipation.

The programme consists of lectures given by international experts and case discussions. The target groups are:

- Young doctors in gastroenterology and surgery
- Specialists in gastroenterology and surgery
- Paediatricians, general practitioners, and others with an interest in constipation.

The meeting is held on Richmond Hotel in central Copenhagen March 11th 2011, 10 a.m. to 6 p.m.

We hope to see you.
