

Scandinavian Association of Neurogastroenterology and Motility

## “New aspects of neurogastroenterology, motility and imaging”

A one day meeting held at  
Tivoli Congress Center, Copenhagen - Denmark  
November 20<sup>th</sup> 2015 from 9.00 a.m. to 3.45 p.m.  
Available within 15 minutes from Copenhagen Airport by train

This year the meeting is free for all doctors in training, participants from outside Denmark, and nurses.

More and more patients expect cures or elimination of their symptoms. In disorders of neurogastroenterology these expectations are often difficult to meet. This patient group is becoming larger as we are now aware of the population of IBD patients with IBS symptoms despite inflammatory remission. We still lack knowledge for understanding and treating disorders of motility and pain sufficiently. The way forward is as always: more research and systematic approaches in the clinic. So join us for this year’s update of the hot topics in neurogastroenterology and imaging guided by a group of international experts. As always, the day will be organized with:

- Lectures held by international experts
- Presentation of cases from the clinic with votes on specific questions stimulating discussions

The target groups are:

- Young doctors in gastroenterology and surgery
- Specialists in gastroenterology and surgery
- Nurses and others with an interest in motility disorders

We hope to see you,

Steering board of SAGIM

### PROGRAMME

9.00	Coffee	
9.10	Welcome	Asbjørn Mohr Drewes
9.15	Introduction	Anne Lund Krarup
<b>Session I: Epidemiology: When, where and how many?</b>		
9.30	Epidemiology of Barrett’s esophagus	Frederik Hviid-Jensen, DK
9.50	Epidemiology of inflammatory bowel disease (IBD)	Tine Jess, DK
10.10	Epidemiology of irritable bowel syndrome (IBS)	Johan Burish, DK
10.30	Break and exhibition	
<b>Session II: Non-pharmacological treatments - a mechanistic approach</b>		
11.00	Diet and gluten sensitivity	Knut Lundin, NO
11.20	Acupuncture and electroceuticals	Adam Farmer, UK
11.40	Hypnosis	Jenny Löydahl, SE
12.00	Lunch	
<b>Session III: Opioid induced bowel dysfunction (OIBD)</b>		
13.00	Three cases of OIBD	Asbjørn Mohr Drewes & Jakob Lykke Poulsen, DK
14.00	Break and exhibition	
<b>Session IV: Pancreas imaging: Step wise algorithm approach</b>		
14.30	Conventional ultrasound	Georg Dimcevski, NO
14.50	MRI	Jens Brøndum Frøkjær, DK
15.10	Endoscopic ultrasound	Bjørn Linquist, SE
15.30	Closing remarks	Lotte Fynne
15.45	SAGIM general assembly
